Sound Forge® 9

Professional Digital Audio Production Suite

Sound Forge® software is the industry standard for media professionals who want to create and edit stereo and multichannel audio files with speed and precision, whether in the studio or out in the field. Acclaimed for its power, stability, and intuitive interface, it's the fastest way to get from raw audio to finished master. Efficiently analyze, record, and edit audio. Produce music loops, digitize and restore old recordings. Model acoustic environments, design sound for multimedia, and master replication-ready CDs.

INCLUDES TOOLS FOR SOUND DESIGN AND MASTERING

CD ARCHITECT 5

CD Architect software is a professional mastering and layout tool for burning Red Book audio CDs. With CD Architect, PQ editing is fast and intuitive. This software is everything you need for precise control over details such as pause times, fades, index markers, time and track manipulation, and CD Text. Master audio by applying over 20 real-time DirectX® effects, and perform seamless disc-at-once CD burning.

NOISE REDUCTION 2

Give new life to audio from LPs, cassettes, CDs, MP3s, and more. The Noise Reduction 2 collection of plug-ins contains Noise Reduction, Audio Restoration, Click and Crackle Removal, and Clipped Peak Restoration. Use these plug-ins to fix common audio problems such as tape hiss, camera hum, clicks, and pops. Easily recondition old tracks and vinyl, problem recordings, and even damaged audio.

MASTERING EFFECTS BUNDLE POWERED BY IZOTOPE

Sound Forge 9 software includes the new Mastering Effects Bundle powered by iZotope, the maker of world-class audio mastering tools. This powerful bundle includes four professional audio plug-ins: Mastering Reverb, Multiband Compressor, the IRC Limiter loudness maximizer, and the Analog EQ parametric equalizer.

Export audio in Dolby® Digital AC-3 surround

Synchronize and score audio with video

Open and edit multichannel audio files

Convert analog recordings to digital audio

Phase Scope meters to visually analyze stereo imaging

Real-time editing and effects processing

Envelopes for precise adjustments to volume and panning levels

Increased mastering flexibility with Mastering Effects Bundle powered by iZotope

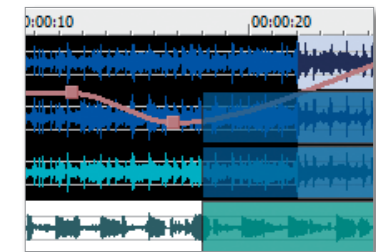

Seamlessly export audio tracks to CD Architect software

STEREO AND MULTICHANNEL RECORDING

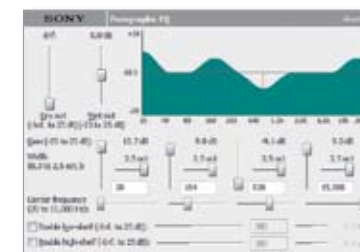

Sound Forge 9 software has a complete set of tools for recording audio. Record straight into your sound card, use automated time-based recording, or audio threshold record triggering. You can also now record and edit multichannel audio files as easily as stereo files.

PRECISE AUDIO EDITING

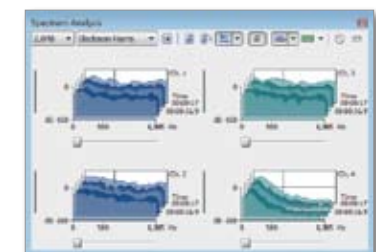

Edit stereo and native multichannel audio files down to the sample level in real time. Use familiar Windows® commands to cut, copy, paste, mix, and crossfade audio. Drag and drop to edit between channels, and work on one file while processing others in the background.

POWERFUL EFFECTS PROCESSING

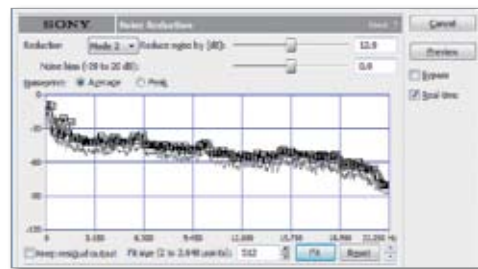

Apply over 40 professional studio effects and processes including Normalize, EQ, and Delay. Sound Forge 9 software also supports DirectX and VST effects (including automation) which expand the number of effects you can apply, and also increases your mastering flexibility.

PROFESSIONAL MASTERING

Preparing your audio for duplication is straightforward and fast. Process with precision and monitor the output in real time. Use the new phase scope and level meters to monitor audio characteristics and view frequencies and overtones with spectrum analysis.

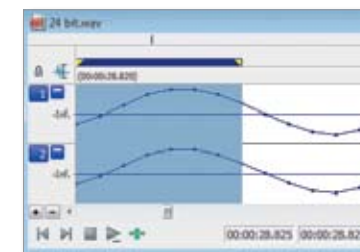

Restore audio using the included Noise Reduction plug-ins

Compress different frequencies or instruments separately with the Multiband Compressor powered by iZotope

PRISTINE SOUND QUALITY

Sound Forge 9 software supports full resolution 24-bit and 32-bit/64-bit float 192 kHz files for ultimate audio fidelity. Capture subtle overtones and nuances of instruments, vocals, and effect changes. Export files in Dolby Digital AC-3 and Windows Media multichannel formats.

AUDIO-FOR-VIDEO

Sound Forge 9 software supports multiple video formats including AVI, WMV, and MPEG-1 and MPEG-2. Synchronize audio and video frame by frame. Import Flash (SWF) files to visually synchronize your audio to your project.

SYSTEM REQUIREMENTS

- Microsoft® Windows® Vista™, XP, or 2000 SP4
- 800 MHz processor
- 150 MB hard-disk space for program installation
- 256 MB RAM
