# Hardware Requirements

## Recommended environments

---

### Mac OS

OS: macOS Monterey (12) / Ventura (13) / Sonoma (14) 64-bit

HDD: More than 500 MBytes free space

CPU: Intel Core i7, Xeon (Nehalem and later)

Memory: 6 GB or more

GPU: AMD Radeon HD 5000 series and later

NVIDIA GeForce GT750M series and later

Model: Mac Pro Late 2013, iMac Mid 2014, MacBook Pro Late 2013, and later

### Windows

OS: Windows 10 2022 Update (22H2),

Windows 11 2022 Update (22H2), 2023 Update (23H2)

HDD: More than 500 MBytes free space

CPU: Intel Core i7, Xeon (Nehalem and later)

Memory: 6 GB or more

GPU: AMD Radeon HD 7000 series and later

NVIDIA GeForce 500 series and later

### Display

Resolution: 1920×1200 or higher

Size: 27 inch or larger

Note: In a multi-display environment, this application does not support switching your primary and secondary screen while running.

### Storage

High speed RAID: (e.g. Thunderbolt RAID, 500MB/sec or faster RAID storage)

# Installation

Note: If a previous version of RAW Viewer is installed, uninstall that version before installing the new version.

## Mac OS

---

- 1) Double click RAW\_Viewer\_v\_r.dmg ("v\_r" indicates the version and region).  
The RAW\_Viewer.pkg appears.**

- 2) Double click the RAW\_Viewer.pkg.  
The installer screen appears.**

- 3) Click the [Continue] button.  
A license agreement screen appears.**

**4) Click the [Continue] button.**

**The following message appears.**

**5) Click the [Agree] button.**

**The installation destination select screen appears.**

**6) Click the installation destination volume.**

**7) Click the [Continue] button.**

**The following screen appears.**

**8) Click the [Install] button.**

**An authentication screen appears.**

- 9) Enter your name and password, and then click the [Install Software] button. The following screen appears when the installation is complete.

If F65RAW Viewer is installed, you can continue to use the F65RAW Viewer settings.

- 10) Click the [Close] button to close the screen.

### To uninstall the application

Move the application icon to the Trash. The default application installation folder is /Applications/RAW Viewer.

## Windows

---

- 1) Double click RAW\_Viewer\_v\_r.exe ("v\_r" indicates the version and region). The setup wizard appears.

- 2) Click the [Next] button in the setup wizard. A license agreement screen appears.

- 3) Click the [Agree] button, and then click the [Next] button.  
The following screen appears.

- 4) Change the settings as required, and then click the [Next] button.

#### To change the installation destination

Click the [Change...] button to open a dialog. Select the folder in the dialog.

The following screen appears.

- 5) If you want to create a RAW Viewer shortcut on the desktop, place a check mark in the [Create a desktop shortcut] check box. If F65RAW Viewer is installed and you want to continue using the F65RAW Viewer settings, place a check mark in the [Retain current settings of 'F65RAW Viewer'] check box. Then, click the [Next] button.

The following screen appears when the installation is complete.

**6) Click the [Finish] button to close the dialog.**

#### **To uninstall the application**

Open the Programs and Features control panel, then select and uninstall [RAW Viewer] from the list of installed programs.

# Launching and Exiting the Application

## Launching the application

---

### Mac OS

Click the RAW Viewer icon in Launchpad. Or, double-click the RAW Viewer icon in the Applications folder using the Finder.

### Windows

Select the [Start] Menu > [All Programs] > [Sony RAW Viewer]. Or, double-click the [RAW Viewer] icon on the desktop.

Note: It is not possible to launch more than one instance of this application at one time.

The application creates a folder structure "Sony/RAW Viewer" in the Documents folder for storing setup information. You should also delete the Sony/RAW Viewer folder after uninstalling the application.

## Exiting the application

---

### Mac OS

Select [Quit RAW Viewer] from the [RAW Viewer] menu.

### Windows

Select [Exit] from the [File] menu.

Note: If you exit the application while an export task is running, the following confirmation dialog appears. If you click the [Yes] button, the running task will be aborted and the application exits. The aborted task will be in the queued state when you next launch the application. By clicking the [Run] button in the Task Queue, you will be able to run the task from the beginning.
